

BRAKE FLUID SERVICE

Many vehicle manufacturers recommend changing your brake fluid about every two years or 30,000 miles.* Make Wynn's *Brake Fluid Service* part of your normal maintenance schedule.

Complete Automotive Maintenance Programs

*Manufacturer's recommendations may vary. See your owner's manual for your vehicle's requirements.

UNSAFE FLUID SAFE FLUID

The appearance of brake fluid isn't always the best way to tell if it needs replacing. Look at your odometer. If you've gone over your OEM recommended service interval or if your brake fluid doesn't meet manufacturer's specifications, it's time to replace your brake fluid.

THE PROBLEM

Moisture is naturally absorbed by brake fluid over time.

- Increased moisture lowers the boiling point of brake fluid, possibly causing sluggish response during panic stops, stop-and-go driving and downhill braking. Since moisture is not visible in brake fluid, visual inspection is of no use.
- Increased moisture contributes to component corrosion, causing potentially expensive repairs (an ABS brake assembly can cost as much as \$1,000).

THE SOLUTION

Complete exchange of the old brake fluid with Wynn's state-of-the-art *BrakeTech™ Rapid Replace Brake Fluid Exchange Machine*.

- New brake fluid is fed into the master cylinder reservoir
- All four wheel cylinders can be bled simultaneously or according to the O.E. bleed sequence
- All moisture and air are eliminated from the brake system

Wynn's Brake Fluid exceeds U.S. Department of Transportation specifications.

- The service helps extend the life of brake system components and provides brakes you can count on in all situations
- Environmentally correct service contains all used brake fluid to minimize technician exposure

HELP KEEP YOUR VEHICLE SAFE WITH A FAST AND COMPLETE WYNN'S® BRAKE FLUID SERVICE.

Complete Automotive Maintenance Programs

Oil – Fuel – Cooling – Transmission – Power Steering
Brake – HVAC – Differential – Battery – Headlight
