

COOLING SERVICE

Cooling system failure is the leading cause of mechanical breakdown. If your cooling system fails, your engine and transmission could suffer major stress-related damage. Make Wynn's *Cooling Service* part of your normal maintenance schedule.

DIRTY RADIATOR

CLEAN RADIATOR

THE PROBLEM

- Coolant degrades over time.
- Rust and scale deposits can build up in the cooling system, which can lead to poor coolant circulation, overheating and vehicle breakdown.
- Cooling system failures are the leading cause of mechanical breakdowns on the road.
- Conventional "drain and refill" services exchange less than 50% of the coolant.

THE SOLUTION

Wynn's® *Cooling Service* removes up to 95% of the old coolant and contaminants.

- Prior to the coolant exchange, a chemical cleaner is added to existing coolant to neutralize acids and safely remove rust, sludge and scale deposits.
- Following the coolant exchange, a proprietary product is added to the fresh coolant that stops most radiator and heater core leaks, prevents foaming and lubricates the water pump.
- Wynn's state-of-the-art coolant exchange equipment is approved by major vehicle manufacturers and ensures a fast and complete cooling system flush service.
- Following the Wynn's *Cooling System Service*, your vehicle's cooling system is again ready to take on the heat of the road.

**TREAT YOUR VEHICLE'S COOLING SYSTEM
RIGHT WITH A WYNN'S® COOLING SERVICE.**
