CLEAN

Wynn's® Diesel Fuel Service is the perfect answer for keeping your diesel engine running the way it was designed.

Wynn's® Diesel Injector Purge cleaning chemical, specifically formulated for this service, is used to:

- Clean the diesel fuel system and injectors
- Improve overall vehicle drivability
- Restore power
- Improve fuel economy
- Reduce harmful emissions

Wynn's Diesel Fuel Service is performed by first connecting Wynn's *Diesel Clean Machine* to the vehicle's fuel system in place of the normal fuel supply. **Wynn's Diesel Injector Purge** is then delivered to the engine, thoroughly cleaning the entire fuel system while the engine runs. (Wynn's *Diesel Injector Purge* is not only a concentrated diesel fuel cleaner, but also has the combustion properties of diesel fuel, which allows the engine to run normally during the cleaning cycle.)

For improved performance, added safety and to help extend the life of your vehicle, make sure a Wynn's® Diesel Fuel Service is a part of your normal maintenance schedule.
