## ENGINE OIL STOP LEAK

Wynn's® Engine Oil Stop Leak is a special blend of chemicals formulated to stop and prevent engine oil leaks and oil burning without dismantling. This product revitalizes rubber and neoprene seals and O-rings, stops oil leaks past valve stem seals and reduces blow-by. Suitable for all Gasoline and Diesel Four-Stroke Engines.

### FEATURES AND BENEFITS:

- ✓ Reduces and Stops Oil Leaks
- ✓ Conditions Seals and Gaskets
- ✓ Reduces Exhaust Smoke Due to Oil Burning
- ✓ Helps Protect Engine from Damage Due to Oil Depletion

### SPECIFICATIONS:

Product No: ZW50602

Net Weight: 11 FL OZ (325 mL)

Case Quantity: 24 Each

## ENGINE OIL STOP LEAK

### THE PROBLEM:

- Neoprene and rubber in older vehicles may shrink and become brittle, allowing oil to seep around the seals and gaskets. This oil contributes to deposit formation and exhaust smoke.
- Older vehicles may also develop pinhole leaks. Thinner viscosity grades offer better fuel economy but are more likely to leak through these openings.

### THE SOLUTION:

- Wynn's® Engine Oil Stop Leak contains conditioners to swell and soften these components and improve their ability to seal.
- Wynn's® Engine Oil Stop Leak contains a high concentration of viscosity modifier to thicken the engine oil, decreasing the likelihood of leaks.

**Application and Treat Rate:** One bottle treats most car engines. For larger engines, treat at 10% of engine oil capacity.

**Directions:** At operating temperature or while engine is warm, add contents to engine oil with engine turned off. Use at each oil change or as needed between oil changes.

**Note:** This product is intended for older gasoline or diesel engines. It is not intended to substitute for mechanical repairs.
