# BRAKE

## LOW VOC BRAKE & PARTS CLEANER

### THE PROBLEM:

- Oil and grease, dirt and grime can build up on brake assemblies over time, interfering with operation and contributing corrosion.
- Metal tools and parts may collect oil and grease, becoming slippery or gritty.
- Brake dust may collect on rotors and pads, causing high-pitched squeaking when the brakes are applied.
- Some brake and part cleaners are formulated with chlorinated solvents. While these are effective cleaners, they present toxicity hazards to the user and to the environment.
- Brake and parts cleaners that use soap or surfactants for cleaning may leave behind a residue that could interfere with operation.

### THE SOLUTION:

- Wynn's® Low VOC Brake & Parts Cleaner cleans away dirt and contaminants. Its quick-drying formula leaves brake surfaces clean and dry.
- Wynn's® Low VOC Brake & Parts Cleaner, sprayed on metal tools, rinses away oil and grease.
- Wynn's® Low VOC Brake Cleaner cleans away brake dust, restoring quiet operation.
- Wynn's® Low VOC Brake & Parts Cleaner cleans effectively without the use of any chlorinated solvents.
- Wynn's® Low VOC Brake & Parts Cleaner uses fast drying solvents. There are no soaps or surfactants, or any component that would leave a residue.

**Application:** Use on any metal surface.

**Directions:** Use only in a well-ventilated area, away from heat and sources of ignition. Read SDS before use. Apply only to cool surfaces. Liberally spray surfaces to be cleaned and allow product to run off.

**NOTE:** Do not use on painted surfaces. If sprayed on paint, immediately wash off with soap and water.
