

FUEL

FUEL INJECTOR CLEANER

Wynn's® Fuel Injector Cleaner contains powerful detergents developed and proven to remove deposits from injectors in one application. Small deposits may disrupt fuel delivery, causing power and performance loss, and increased emissions. Modern engines require precise fuel delivery for optimal performance and pollution control. This professional product was formulated with polyisobutylene amine (PIBA) to keep intake valves in port-fuel injected vehicles clean and functioning at their best.

FEATURES AND BENEFITS:

- ✓ Cleans Fuel Injectors in One Application
- ✓ Maintains Power and Performance
- ✓ Keeps PFI Intake Valves Clean with Repeated Use
- ✓ Reduces Exhaust Emissions
- ✓ Helps Restore Fuel Economy

SPECIFICATIONS:

Product No: ZW65221A

Net Weight: 11 OZ (325 mL)

Case Quantity: 24 Each

FUEL

FUEL INJECTOR CLEANER

THE PROBLEM:

- Injectors are designed to spray fuel into the chamber to achieve optimum fuel/air mixing for combustion. When injectors become clogged by carbon deposits, the outcome is loss of power.
- A small amount of injector fouling has been shown to increase particulate contamination and gaseous pollutants (hydrocarbons, NOx, and carbon monoxide) in the vehicle's emission.
- Some gasoline is less additized at the pump. This may be especially true of non-Top Tier gasoline. The vehicle owner saves money in the short term, but due to decreased fuel economy and the need for more frequent fuel system services, will waste unnecessary funds in the end.

THE SOLUTION:

- Polyisobutylene amines (PIBA) are powerful agents that are very efficient at cleaning injector deposits. One bottle of Wynn's® Fuel Injector Cleaner in the gas tank cleans carbon deposits from injectors, restoring performance.
- Wynn's® Fuel Injector Cleaner reduces harmful emissions caused by injector deposits by restoring spray patterns and promoting complete combustion.
- Wynn's® Fuel Injector Cleaner, used periodically as a keep-clean product, is an economical way to eliminate injector fouling and keep PFI intake valves clean.

Directions: Add Wynn's® Fuel Injector Cleaner to gas tank.

Application and Treat Rate: Treats up to 20 gallons.

Limitations: As with any tank pour-in, effective cleaning of intake valve tulips and stems is obtained in port fuel-injected (PFI) engines only.
