

# FUEL

## ADVANCED POWER CLEAN

Wynn's® Advanced Power Clean is formulated with a more robust detergent package that is proven to remove deposit buildup after just one application. GDI technology, while improving performance and fuel economy, contributes to more deposit formation and particulate emissions. This enhanced blend offers superior cleaning to both GDI and PFI engines. Wynn's® Advanced Power Clean is the solution to remove carbon buildup and protect against friction and wear.

### FEATURES AND BENEFITS:

- ✓ Cleans GDI and PFI Fuel Injectors, Intake Valves (PFI), Ports (PFI), and Combustion Chambers
- ✓ Restores Power, Performance and Fuel Economy
- ✓ Reduces Friction, Component Wear and Fuel Oxidation
- ✓ Compatible with Gasoline up to E-15
- ✓ One Tank Cleanup
- ✓ Notable Improvement in High Mileage Vehicles
- ✓ Treats up to 20 Gallons
- ✓ No Harm to Motor Oils Cleanliness

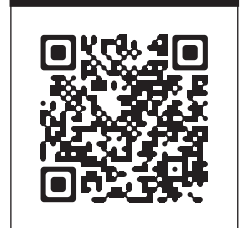

### SPECIFICATIONS:

Product No: ZW66901A

Weight: 11 OZ (325 mL)

Case Quantity: 24 Each

# FUEL

## ADVANCED POWER CLEAN

### THE PROBLEM:

- Deposits are a byproduct of the combustion process. The combustion chamber, the most difficult part of the engine to clean, is susceptible to carbon buildup on piston tops and cylinder heads which can cause preignition, loss of performance, and potentially severe engine damage.
- Deposit formation on intake valves affects the proper opening and closing of the valves which negatively impacts intake flow.
- Fuel injector deposits alter the precision spray pattern into the combustion chamber and can reduce the volume injected for combustion. This can lead to inefficient combustion, increased emissions, and drivability complaints.
- With each gallon of gasoline burned, deposit formation is created. These deposits, unless removed, will negatively affect engine performance and, over time, contribute to engine wear and potential component failure.

### THE SOLUTION:

- Wynn's® Advanced Power Clean is specially formulated with an enhanced detergent package. This premium product is designed to remove deposits from the combustion chamber after just one application.
- Wynn's® Advanced Power Clean has a combination of highly concentrated fuel detergents that effectively cleans intake valves on PFI engines allowing them to seat properly.
- Wynn's® Advanced Power Clean is designed to prevent the formation and accumulation of deposits and maintain the flow and spray pattern of fuel injectors. Wynn's® Advanced Power Clean is designed to clean fuel injector deposits in just one tank of gasoline.
- Wynn's® Advanced Power Clean is designed to restore horsepower and provide protection against friction and wear.

**Directions:** Pour into fuel tank.

For gasoline engines only. One bottle treats up to 20 gallons of gasoline. Recommended service interval every 7,500 miles.
