

ENGINE

FIFTY +PLUS+™ OIL TREATMENT

Wynn's® Fifty +Plus+™ Oil Treatment is specifically designed for higher mileage vehicles (50,000 miles/ 80,000 kilometers). Formulated to extend the engine life by reducing friction and wear, reduce oil burning and tailpipe smoke, and increase oil pressure and viscosity at all temperatures.

FEATURES AND BENEFITS:

- ✓ Extends Engine Life
- ✓ Reduces Oil Consumption
- ✓ Specially Formulated to Reduce Friction and Wear
- ✓ Increases Oil Viscosity and Improves Engine Compression
- ✓ Inhibits Corrosion, Oil Oxidation and Deposit Formation
- ✓ Conditions Seals and Gaskets
- ✓ Reduces Exhaust Smoke Due to Oil Burning
- ✓ Engineered for GDI, MPFI, Hybrid and Turbo-Charged Engines

SPECIFICATIONS:

Product No: ZW68711

Net Weight: 11 FL OZ (325 mL)

Case Quantity: 24 Each

ENGINE

FIFTY +PLUS+™ OIL TREATMENT

THE PROBLEM:

- Neoprene and rubber in older vehicles may shrink and become brittle, allowing oil to seep around the seals and gaskets.
- Older vehicles may develop pinhole leaks. Thinner viscosity grades offer better fuel economy but are more likely to leak through these openings.
- Leaking oil contributes to deposit formation and exhaust smoke.

THE SOLUTION:

- Wynn's® Fifty +Plus+™ contains conditioners to swell and soften these components and improve their ability to seal.
- Wynn's® Fifty +Plus+™ contains a high concentration of viscosity modifier to thicken the engine oil, decreasing the likelihood of leaks.
- Adding Wynn's® Fifty +Plus+™ to the crankcase stops and prevents oil leaks from causing deposit formation and exhaust smoke.

Application and Treat Rate: One bottle treats most car engines.

Directions: Add to crankcase with engine at operating temperature. Restart engine and allow idling for at least 5 minutes to circulate treatment throughout system. Treats up to 5 quarts (4.7 L) of oil.

Note: This product is intended for older gasoline engines. It is not intended to substitute for mechanical repairs.
