

# POWER STEERING

## SYNTHETIC POWER STEERING FLUID

Wynn's® Synthetic Power Steering Fluid is formulated with premium synthetic base oils and a shear-stable viscosity index improver for excellent performance at both high and low temperatures. This valuable product conditions seals, extending the power steering system's longevity. The carefully formulated fluid is blended with a detergent package that keeps components clean as well as provides protection against rust, oxidation, foam and wear. Use Wynn's® Synthetic Power Steering Fluid where synthetic power steering fluid is recommended, or as an upgrade to conventional power steering fluids (except Honda and Acura).

### FEATURES AND BENEFITS:

- ✓ Premium Full Synthetic Formula
- ✓ Premium Alternative to Standard PSF in Most Makes & Models
- ✓ Provides Excellent Low-Temperature Performance
- ✓ Compatible with Electric Power Steering Systems
- ✓ Excellent Oxidation Stability for Resistance to Fluid Breakdown

### SPECIFICATIONS:

**Product No:** ZW57132 (Green)

**Net Weight:** 1 QT (946 mL)

**Case Quantity:** 12 Each

# POWER STEERING

## SYNTHETIC POWER STEERING FLUID

### THE PROBLEM:

- Temperature extremes affect the performance of power steering fluids. In cold temperatures the fluid may thicken, causing stiffness and difficulty steering. In hot temperatures, the fluid may become too thin to protect moving parts.
- Over time, power steering fluid may break down due to oxidation. Viscosity changes, sludge forms, and acid products of oxidation may cause corrosion of metal parts.
- Synthetic fluids, while offering excellent high- and low-temperature characteristics, superior lubricity, and resistance to oxidation, may attack rubbery components like seals and gaskets.

### THE SOLUTION:

- Wynn's® Synthetic Power Steering Fluid is formulated with synthetic base oils and a premium viscosity modifier chosen for its high viscosity index and shear stability. This effective product has been tested and proven to maintain functional viscosity through a wide temperature range.
- The oxidation protection in Wynn's® Synthetic Power Steering Fluid prevents fluid breakdown, increasing the durability of the fluid's efficiency.
- Wynn's® Synthetic Power Steering Fluid is formulated with conditioning agents that protect and condition seals and gaskets, preventing or reducing leakage.

**Directions:** Use as a top off fluid or refer to job aid for fluid exchange.
